SUSTAINABLE VERMICOMPOSTING OF SALVINIA MOLESTA, MITCHELL

LAP Lambert Academic Publishing Mai 2013, 2013. Taschenbuch. Book Condition: Neu. 220x150x6 mm. Neuware - Research into vermicomposting and commercial projects has been developed in many countries. The increased interest in the use of earthworms in waste management seems a real and significant trend, across the world. The presentations at the four symposia cover a wide range, including the biology and ecology of vermicomposting species of earthworms, aquatic weed *Salvinia molesta*, methods of vermicomposting and the effects of growth of earthworms on *salvinia*. From my personal research experience, it is a challenge for scientists to bridge the gap between the laboratory and the field. Albeit, this book reviewed one of the most important methods and the whole human race will benefit if vermicomposting technology is accepted and adopted. 100 pp. Englisch.
